ECON 331: Environmental Economics

ChatGPT/AI & General Honor Code

I, _____on date _____
acknowledge that while ChatGPT/AI exists and can be a useful tool for creating
practice problems, clarifying understanding, and reviewing material, copying and
pasting responses from ChatGPT, or any other AI in this class will constitute pla-
giarism and will be treated as academic dishonesty/cheating under the Binghamton
University Academic Dishonesty Code. This includes, but is not limited to, home-
works, the Final Project, and slides for pitching my group's final project idea.

Further, I understand using ChatGPT/AI to check grammar or spelling is allowed
under this ChatGPT/AI Honor Code. I may use ChatGPT/AI to find references,
but all references are subject to review and I accept any consequences for including
false references due to ChatGPT/AI hallucinations.

Finally, I agree to uphold both this ChatGPT/AI policy and the University's Aca-
demic Dishonesty Code. I also agree to accept consequences should I decide to violate
either the ChatGPT/AI policy and/or the University's Academic Dishonesty Code.
These consequences may include receiving a 0 on part/all of an assignment or exam
or the opening of proceedings with University directly. In short, I agree not to cheat
in this class.

Signed: _____
